

Enabling Data Sharing Action Group

ACTION GROUP OVERVIEW

Enabling Data Sharing: Water Data Space

Interoperability & data
standardization

Sovereignty
Data & Services

Relevant Projects

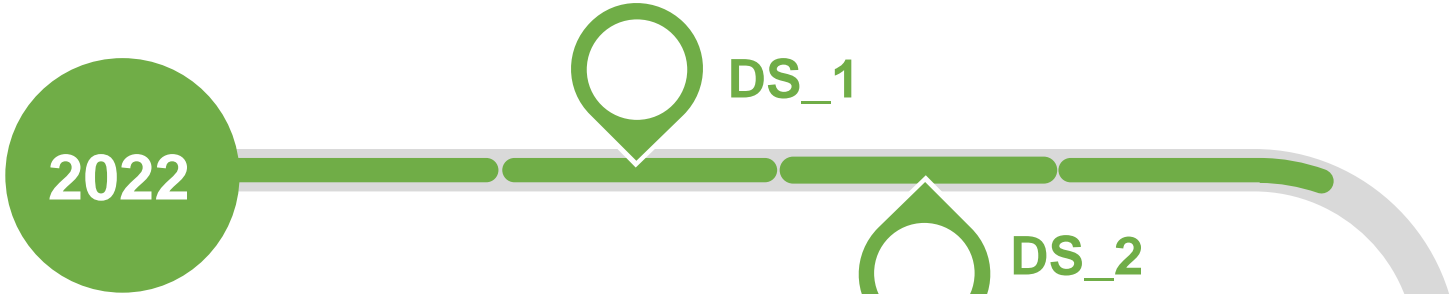

Aqua3S, F4W, NAIADES,
ScorWater, iBathwater,
PathoCERT, **AquaSpice**, B-
Water-Smart, Water Mining,
IMPETUS, NEXOGENESIS,
ARSINOE

Updated Digital Action Plan

Enabling Data Sharing Task	Duration
DS_1. Development and extension of smart data models	2022-2024
DS_2. Demonstrate value of Data Sharing in the water sector through successful examples	2022-2024
DS_3. Identify and overcome barriers for data sharing	2022-2026
DS_4. Extend and expand water interoperability and standardisation	2022-2032
DS_5. Towards the establishment, consolidation and expansion of water-climate data spaces	2025-2032
DS_6. Climate data and prediction models sharing and good practices for the water sector	2022-2026

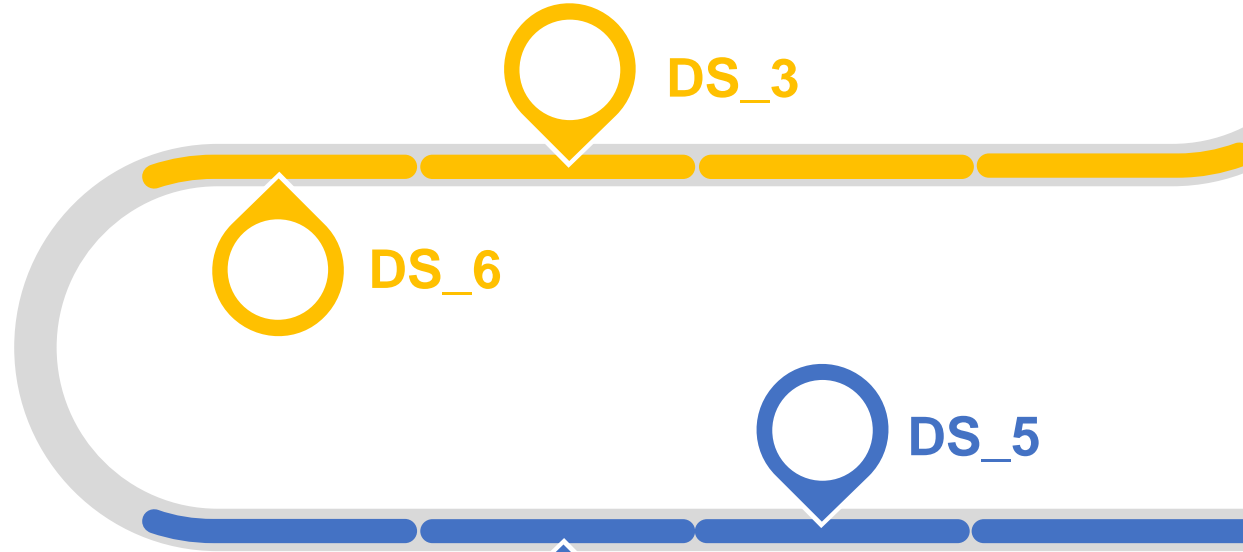

Updated Digital Action Plan

Semantic Interoperability

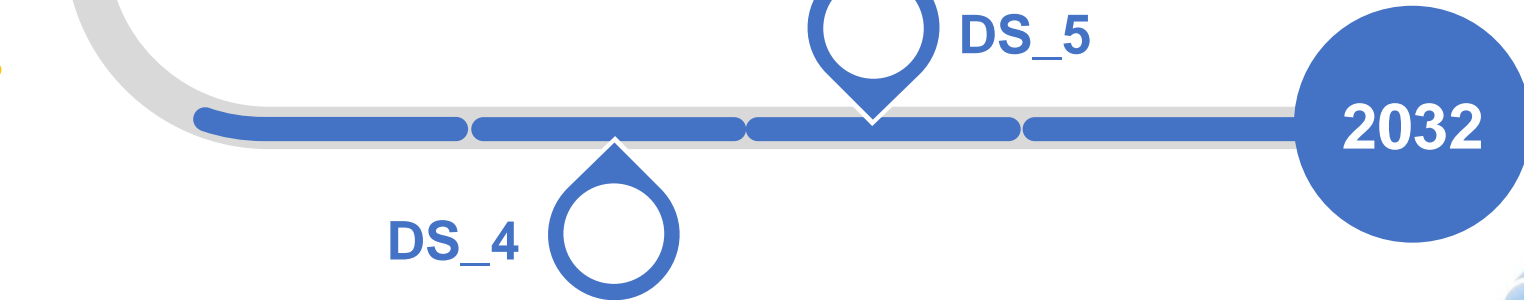

Data Sharing & Smart Data Models

Data Sharing barriers & Data interlink between domains

Water Data Spaces

Challenges and Topics for Discussion

1. What are the main issues for standardisation and interoperability of digital water data in Europe?
2. What are the challenges arising for the water sector by the European Data Spaces?
